

HC-POD FINAL INTEGRATION RECORD

HealthConnect Experience Lab - Week 8

1. TRACK COLLABORATED WITH

Data Science Track

2. PROJECT DEPENDENCY

Analytical findings inform final model interpretation

3. OUTPUT RECEIVED

From Data Science Track:

- Feature importance from final model
- Model performance insights
- Confirmation of key predictors

4. OUTPUT PROVIDED

To Data Science Track:

- Validated KPIs (No-Show Rate: 48.5%)
- Segment analysis findings
- Feature recommendations
- Statistical validation results

5. FINAL INTEGRATION ACTIVITY

- Shared final analytics package

- Aligned on key predictors
- Validated findings against model results
- Documented joint findings

6. WHAT CHANGED

Before Integration:

- Unvalidated analytical findings
- Unclear feature importance
- Separate analysis and modelling

After Integration:

- Validated insights
- Clear feature importance ranking
- Aligned approach to no-show prediction

7. HOW THE CHANGE IMPROVED THE SOLUTION

- More accurate prediction model
- Targeted recommendations
- Evidence-based decision support
- Improved patient support strategy

8. EVIDENCE

- Updated dashboard with validated findings
- Feature recommendations document
- Joint summary of findings
- Meeting notes

9. CONTRIBUTION TO FINAL PRESENTATION

- Analytics section with KPIs and insights
- Dashboard demonstration
- Business recommendations
- Cross-track collaboration evidence
